

Additional information for a research period at Université Gustave Eiffel

1. An additional funding of 27.30 euro per worked day may be allocated to the selected candidate (roughly 500 euro per month).

2. A longer stay is encouraged, by experience six months being a more suitable duration for a productive research stay. However, unfortunately we can only supply the funding mentioned at point 1. It is possible to start a collaboration to be continued remotely after the visit. Otherwise, three months are hardly enough to start and complete an actual scientific contribution.

3. Speaking French is encouraged but not compulsory. The supervisors and the direct collaborators are all fluent in English, and Lille is a rather international student city. However, bureaucracy and many social activities are more accessible in French.
